1. Tell me about yourself

Ans: I am a web developer with amazing ability. I always love to learn new techniques and take on challenges. It is the right place for me. I think beyond my think. I always learn new technology to grow up-skill, not for only hunger.

2. Which is your best project. How many challenges did you face when you did this project?

Ans: My best project is a bike parts website. It's a very interesting project for me. When I am working on this project. I had to face some problems. And I am searching for the answer on google StackOverflow and I read much documentation on the problem. It took me one and a half days to solve the problem. But the interesting part is when I solve the problem I notice that I am using jsonStringify instead of the number

3. Why should we hire you?

Ans. I have all the qualifications and skills that you have mentioned in the job description. And I am confident that I will make an immediate impact on your company. If you choose me for this role I will continue to deliver high-quality work for the continued success of your company

4. What is your salary expectation?

Ans: In this stage learning and experience are most important for me. I want to grow up in a competitive environment. I want to do many projects. If you give me 25k to 30k that is enough for me

5. Do you have any questions for us?

Ans: Yes, I have some questions. The first question is what do you expect from me in the first month. How do you select the right technology for your project? How do you explore that your all developer is learning new things and they are up to date
